DETAILED ACTION

Specification

~~NOT AVAILABLE~~

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-110 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujii et al..

Fujii et al. discloses a method of protecting a MEMS structure during dicing including preparing a MEMS wafer having a plurality of structures thereon, mounting a cap to produce a laminated MEMS wafer, the cap being recessed in areas corresponding to locations of the MEMS structure sites, dicing the wafer into a plurality of MEMS dies, and removing the cap. Also disclosed are suggestions to use various known materials and methods in forming the structure (see figs. 1A-2C, 8A-8F and related text).
